Codeforces-Engine

Release 1.0

Radhesh Sarma

CONTENTS:

1	query module	1
2	preprocess module	2
3	api module	3
4	docs_precompute module	4
5	Indices and tables	5
Py	thon Module Index	6
In	dex	7

ONE

QUERY MODULE

 $\verb"query.expand_query" (\textit{text})$

 $\verb"query.query", no_of_docs")$

CHAPTER	
TWO	

PREPROCESS MODULE

preprocess.pre_process(text)

THREE

API MODULE

```
class api.HelloWorld
    Bases: flask_restful.Resource
    endpoint = 'helloworld'
    get()
    mediatypes()
    methods = {'GET', 'POST'}
    post()
api.after_request(response)
```

FOUR

DOCS_PRECOMPUTE MODULE

docs_precompute.calculate_tf_idf_docs()
docs_precompute.get_docs()

FIVE

INDICES AND TABLES

- genindex
- modindex
- search

PYTHON MODULE INDEX

```
a
api, 3
d
docs_precompute, 4
p
preprocess, 2
q
query, 1
```

INDEX

```
Α
after_request() (in module api), 3
api
    module, 3
C
calculate_tf_idf_docs()
                                  (in
                                         module
        docs_precompute), 4
D
docs_precompute
    module, 4
Ε
endpoint (api.HelloWorld attribute), 3
expand_query() (in module query), 1
get () (api.HelloWorld method), 3
get_docs() (in module docs_precompute), 4
Η
HelloWorld (class in api), 3
mediatypes () (api.HelloWorld method), 3
methods (api.HelloWorld attribute), 3
module
    api, 3
